

MAPELEVEL EASYWDG SYSTEM

Tile levelling system for ceramic
and stone tiles

MapeLevel EasyWDG System

The **Mapei** levelling system **MapeLevel EasyWDG System** is designed for a faster and easier tile installation. Easy to install, it enables to obtain perfectly flat floor and wall coverings, even in the most difficult cases, such as the installation of large-format slabs.

Just two components and one simple movement are enough to **quickly** and **accurately** prevent lippage between adjacent tiles. For perfect tiling in less time.

MapeLevel EasyWDG System is mainly made of recycled plastic material, respecting the environment.

Where to use

- For ceramic tiles and stone slabs on floors and walls.
- Particularly suitable when installing large format tiles.
- For tiles with thickness from 3 to 12 mm.

System composition

Wedges

MapeLevel EasyWDG

Spacers

MapeLevel EasyWDG Spacer M

A complete range of coloured spacers is available depending on the width of the joint (mm)
orange: 0.5, green: 1, grey: 1.5,
black: 2, white: 3, yellow: 4, red: 5

Kit

Kit MapeLevel EasyWDG System

150 levelling wedges +
150 spacers (2 mm)

Before application

After application

An installation with several **advantages**

Manual application, no pliers required

MapeLevel EasyWDC System is applied by hand and is easier to regulate.

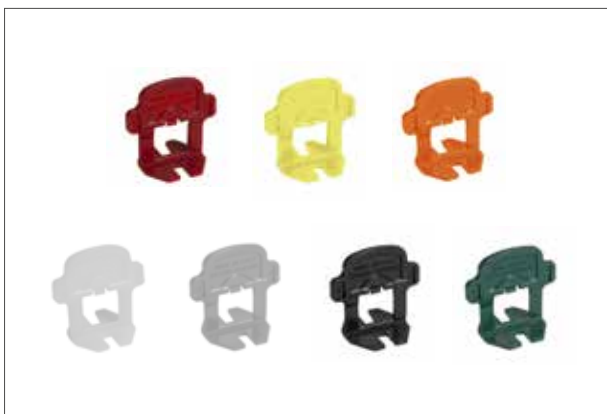

Ergonomically shaped wedge

The ergonomic shape of the wedge allows it to be inserted smoothly and quickly into the spacer clips, for a rapid and easy application.

Special knurling

The special tight, close-pitched ribs on the surface of the wedge guarantee more precision when levelling tiles and make it easier to insert and tighten the wedge in the spacers.

Complete range of coloured spacers

A complete range of spacers available in 7 thicknesses with different colours, to help the installer obtain perfectly straight and uniform grouts.

Easy removal

For quick and accurate removal, spacer clips are designed to snap off perfectly below the level of the tiling.

Reusable wedge

Once the upper parts of the spacer are removed, the wedge is easily separated from the disposable clips and can be re-used.

Easy, fast and **simple**

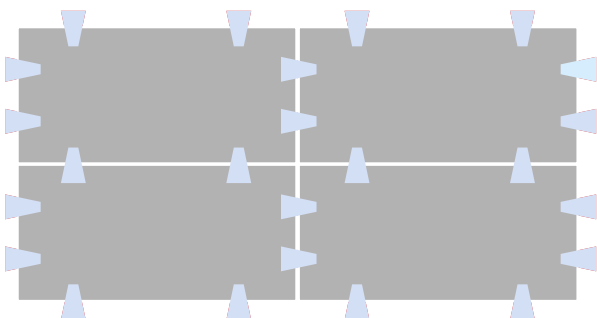

Consumption table

Approximate number of wedges and spacers needed for a surface of 10 m².
